LED frequency displays

Measuring range 1/min or 1/sec HRA-measurement (DC)

Codix 522

The Codix 522 is a simple voltage powered frequency display / tachometer.

Display in 1/min or 1/sec, freely scalable, for fast and slow count pulses, with 6-digit LED display for NPN, PNP input signals, with fast HRA measurement system (High Rate Accuracy).

Powerful

- · Very bright LED display, 8 mm high
- Fast count input input frequency max. 60 kHz
- · Robust housing IP65 protected
- Very accurate precise frequency measurement principle (HRA - High Rate Accuracy System) Frequencies up to 38 Hz are calculated using time-interval (period duration) measurement. Frequencies > 38 Hz are calculated using a special time base (gate time) measurement. A very high accuracy of < 0.1% is achieved, even with very short gate times. The resulting measurement is available after a max. of 50 ms.

User-friendly and universal

- Large keys can also be operated when wearing gloves
- Simple uniform menu-driven programming and operation. Possible to enter the programming also during operation with a confirmation prompt.
- Individually programmable scaling multiplication and division factor (0.0001 to 99.9999), to display corresponding engineering units, e.g. frequency in Hz and speed in RPM
- Programmable decimal point, can be set from 0.0 to 0.000 (this determines the resolution)
- · Programmable delay until 0 is displayed
- Display in 1/min or 1/sec
- As an alternative to the HTL inputs, devices with a 4 ... 30 V DC input level are available
- · Optional output for zero-speed monitoring

Applications for speed and frequency displays

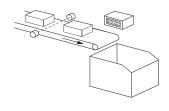

- Rotary speed applications, e.g. OEM equipment or retrofitting to drilling machines
- OEM equipment for flow rate measuring, e.g. current flow rate; production data such as volume/time
- Speed applications on motors, turbines, machines; feed-rate measurement
- Recording of production rates
- Frequency measurement
